1.3.1	0.0.0 . . . . .	3
<b>2</b>	<b>Quickstart</b>	<b>5</b>

This is a personal website demonstration project for learning Python, Flask and much more.

This part of the documentation will show you how to get started with project.

## 1.1 Project progress

Captain's log stardate 95027.77.

Work on setting up continuous integration has resulted in integration of Travis CI and ReadTheDocs for the project. A simple sample python file currently ensures the project passes, this will eventually be superseded by the project itself. Integration of the ReadTheDocs was straight forward, this required a change to the readme file for the main github page, however, this is much better.

Next step for this project is working on the unit testing and building up the site.

## 1.2 Features

Python3 PyPy3.1.1 PyTest Flask

## 1.3 Changelog

### 1.3.1 0.0.0

First stage, not working. So why is this known as a release??

## CHAPTER 2

---

Quickstart

---

TBD
